

CLOUD COMPUTING LAB -05

Name: Drishti.

Roll No.: 1928228

Date: 02/02/2022

Task01:

Change user bases each time and compare their average response time by retaining one datacenter in only one area (e.g., North America).

In this software, there are a total of 6 regions (continents) (North America-0, South America-1, Europe-2, Asia-3, Africa -4, Australia-5)

Configure Simulation

Main Configuration

Data Center Configuration

Advanced

Simulation Duration:

60.0

min

User bases:

Name	Region	Requests per User per Hr	Data Size per Request (bytes)	Peak Hours Start (GMT)	Peak Hours End (GMT)	Avg Peak Users	Avg Off-Peak Users
UB1	0	60	100	3	9	1000	100

Following are the screenshots and the export from the cloud simulator.

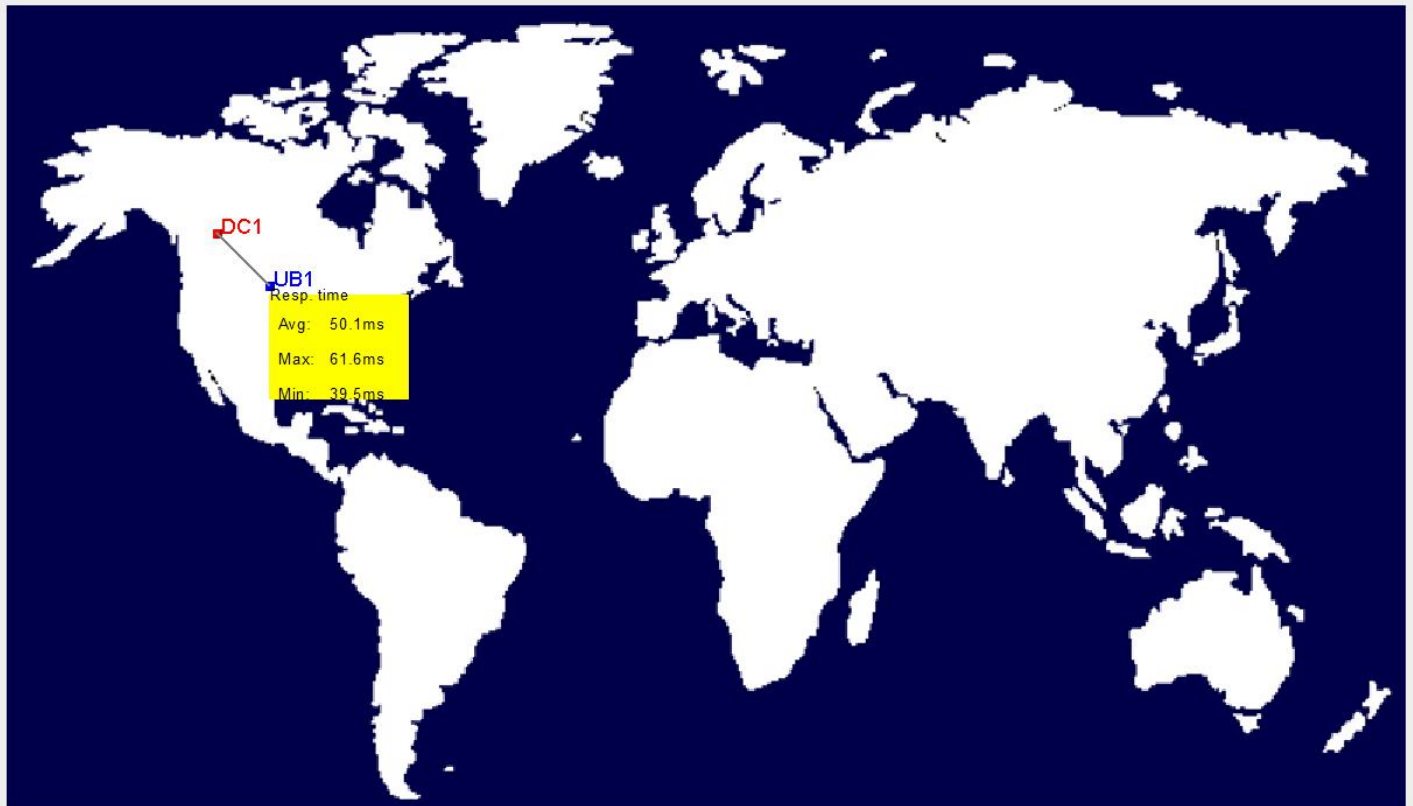

Here there is one datacentre and 1 user base. Data centre is in region 0 as well as userbase (North America)

The average response time is: 50.1 millisecond

The minimum response time is: 39.5 millisecond

The maximum response time is: 61.6 millisecond

Simulation Complete

Results of the Simulation Completed at: 02/02/2022 10:08:23

Graph comparing average response time, maximum response time and minimum response time of all the user base in different regions with respect to the data center in region-0 (North America)

Task02:

In this case, we're looking at six user bases, each of which is located in a different region ranging from 0,1,2,3,4,5, and four data centres in 0,1,2,3 regions. We'll examine how long it takes for all of the connections to respond, based on the service broker's policies for efficient data centre use.
